Weatherization Assistance Program

Weatherization Assistance Program Income Eligibility

Note: Meeting income requirements alone does not guarantee services will be provided. Program availability may depend on current funding and may vary based on your utility provider. Eligible households may be placed on a waiting list, with timelines varying based on program demand and capacity. Please contact your county's local weatherization service provider for the most current information about program status and estimated wait times. [Use this interactive map](#) to find your county's weatherization service provider.

Income eligibility is determined by county, household size, and household income or through current enrollment in any of the assistance programs listed below.

The WAP Income Eligibility Chart indicates the highest eligible income level for each county based on 80% area median income, 60% state median income, or 200% of the federal poverty line. Find your county's income limit: [WAP Income Eligibility chart](#).

For households with more than 10 people, please contact your local weatherization service provider.

If you currently receive financial assistance from any of the following programs, you may automatically qualify for weatherization services:

- Aid to the Needy and Disabled (AND)
- Temporary Assistance for Needy Families (TANF)
- Supplemental Security Income (SSI)
- Supplemental Nutrition Assistance Program (SNAP)
- Low Income Energy Assistance Program (LEAP)

For more information about WAP income eligibility criteria, [please view the WAP FAQ Document](#).
